PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of production experience building high-performance e-commerce platforms, payment systems, and data-driven web applications using React.js, Next.js, and TypeScript. Proven track record of independently owning full project lifecycles from architecture design to production deployment across Swedish e-commerce brands. Expertise spans multi-gateway payment orchestration (Stripe, Adyen, Klarna), SSR performance optimization (~40% rendering improvements), advanced analytics instrumentation (GTM, GA4, Meta Pixel, TikTok), and personalized recommendation engine integrations (Recombee). Adept at collaborating cross-functionally to ship scalable, SEO-optimized, conversion-focused features that directly support business revenue goals.

WORK EXPERIENCE

Frontend Developer Nov 2023 – Apr 2026

Hazesoft Pvt. Ltd. | Kathmandu, Nepal

[Arbetsbyxor.com](#) — Swedish E-Commerce Workwear Platform

- Independently owned end-to-end frontend development of Arbetsbyxor.com, a production Swedish workwear e-commerce store architecting the component system, managing releases, and coordinating directly with stakeholders.
- Designed and implemented a flexible CMS builder component, enabling non-technical teams to manage storefront layouts without engineering intervention.
- Integrated Svea payment gateway into the checkout flow, delivering a localized, conversion-optimized payment experience for Swedish customers.
- Implemented Recombee recommendation engine via API integration, powering personalized product discovery across the entire customer journey and driving cross-sell opportunities.
- Achieved ~40% improvement in page rendering efficiency by implementing Server-Side Rendering (SSR) with Next.js, significantly reducing Time to First Byte (TTFB) and improving Core Web Vitals.
- Built and maintained a scalable reusable UI component library, reducing redundant code and accelerating feature delivery across the platform.

[ReuselT.se](#) — Swedish Refurbished Tech E-Commerce Platform

- Architected and implemented a comprehensive Google Tag Manager (GTM) data layer strategy, enabling accurate marketing attribution and behavioral event tracking across the entire purchase funnel.
- Configured and maintained multi-platform analytics stack including Google Analytics 4, Facebook Meta Pixel, TikTok Analytics, and Mailchimp, improving campaign targeting precision and marketing ROI visibility.
- Built server-generated XML sitemaps, improving SEO crawl efficiency and search engine indexing coverage for the product catalog.
- Collaborated closely with backend developers to ensure server-side data pipelines aligned with frontend tracking requirements, improving data accuracy for marketing and growth teams.
- Implemented Redis caching layer, reducing server load and improving page load performance across high-traffic product listing pages.

[Zonefloorball.com](#) — *International Floorball Equipment E-Commerce*

- Integrated Lipscore ratings and reviews platform via direct API (not widget) to build a fully custom review experience on Product Detail Pages, increasing buyer confidence and conversion rates.
- Implemented Recombee-powered recommendation flows across PDPs, search results, and the shopping cart including cross-sell logic based on purchase history and cart contents, boosting average order value.
- Enforced HTTP-only cookie-based authentication strategy, hardening application security against XSS-based session hijacking.
- Managed Google Shopping and Google Merchant Center integrations, improving product discoverability and supporting performance marketing campaigns.
- Configured Google Tag Manager for event tracking and analytics instrumentation aligned with e-commerce KPIs.
- Implemented canonical tags and hreflang alternate links across the platform, preventing duplicate content penalties and ensuring correct language/region targeting for international SEO across multiple market locales.

Tech Stack: *Next.js, React.js, TypeScript, Node.js, Express.js, MySQL, Styled Components, Recombee, Lipscore, Redis, GTM, Google Analytics 4, Meta Pixel, TikTok Analytics, Mailchimp, Svea Payments, Redux, React Query, Formik, Yup, Zod, Jest*

Trainee Frontend Developer *May 2023 – Oct 2023*

Hazesoft Pvt. Ltd. | Kathmandu, Nepal

[Sail Racing](#) — *Swedish Premium Sailing & Outdoor Apparel Brand*

- Delivered coupon/discount code functionality into the cart and checkout flow, supporting promotional campaign execution.
- Gained hands-on experience with production-grade Next.js and Styled Components codebases, following industry best practices for code quality and version control with GitLab.

Tech Stack: *Next.js, React.js, TypeScript, Styled Components, GitLab*

Frontend Developer Intern *Feb 2023 – Apr 2023*

Hazesoft Pvt. Ltd. | Kathmandu, Nepal

- Developed responsive, cross-device UI layouts using HTML, CSS, and JavaScript under senior developer mentorship.
- Participated in code reviews and adopted industry-standard development workflows including Git-based version control.
- Learned and applied core frontend development best practices, contributing to small internal React and Next.js projects.

Tech Stack: *HTML, CSS, JavaScript, React.js, Next.js, Git*

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling: Tailwind CSS, Styled Components, CSS Modules, Sass/SCSS

State & Data: Zustand, Redux, React Query, TanStack Table, Context API, Formik, React Hook Form, Yup, Zod

Backend & APIs: Node.js, Express.js, REST APIs, SSR, Redis, MongoDB, MySQL, PostgreSQL, Drizzle ORM

Payments: Stripe, Adyen, Klarna, Svea Payments

Analytics & MarTech: Google Tag Manager, Google Analytics 4, Facebook Meta Pixel, TikTok Analytics, Mailchimp

E-Commerce & Integrations: Recombee (Recommendation Engine), Lipscore, Google Shopping, Google Merchant Center

Ai Tools: FreeBuff, Aistdio, Antigravity, Replit, Manus, Claude, Gemini, Chatgpt, Codex, NotebookLm

Testing & Quality: Jest, Unit Testing, Code Reviews

Tools & Platforms: Git, GitLab, VS Code, Postman, Chrome DevTools, ClickUp, Figma, AI Tools

Performance & SEO: Server-Side Rendering (SSR), Core Web Vitals, XML Sitemaps, Image Optimization, Lazy Loading

PERSONAL PROJECTS

Mundum Trail — Cultural Trekking & Tourism Platform

- Conceptualized and independently built a cinematic, immersive tourism web platform promoting Nepal's sacred Mundum Trail, driven by a personal goal to digitize cultural trekking experiences and empower local communities through increased tourism visibility.
- Leveraged AI-assisted development tools (Antigravity, Freebuff) to accelerate UI/UX design and content generation, demonstrating ability to ship production-quality projects efficiently using modern AI-augmented workflows.
- Implemented SEO best practices including structured meta tags and keyword optimization targeting adventure tourism and cultural trekking search intent improving organic discoverability for Nepal tourism audiences.
- Built a dedicated local products section to promote artisan goods from Mundum Trail communities, creating a direct digital commerce channel for local vendors.

Tech Stack: *HTML, CSS, JavaScript, AI Tools (Antigravity, Freebuff), SEO Optimization, Vercel*

Brothers Garage — Automotive Business Profile Website

- Designed and developed a professional static business profile website for Brothers Garage, an automotive service business translating real-world client requirements into a clean, mobile-responsive digital presence.
- Owned the full project lifecycle: gathered client requirements, defined site structure and content hierarchy, built all UI components, and deployed to production on Vercel.
- Applied semantic HTML, responsive CSS, and on-page SEO techniques (meta descriptions, structured headings) to ensure local discoverability and cross-device compatibility.
- Demonstrated client-facing communication skills by converting a physical business identity into clear, conversion-focused web copy and layout.

Tech Stack: *HTML, CSS, JavaScript, Replit, Vercel, Responsive Design, SEO*

Bhaiko Swad — Authentic Nepali Food & Restaurant Platform

- Designed and developed an immersive, visually rich restaurant and food culture website celebrating authentic Nepali cuisine, delivering a smooth and engaging UI/UX experience that reflects the warmth and character of Nepali food culture.
- Built entirely using FreeBuff for rapid UI scaffolding and Claude for intelligent UI/UX decisions, layout refinements, and interaction polish — showcasing a modern AI-augmented development workflow that ships production-quality results efficiently.
- Crafted a smooth browsing experience with thoughtful animations, responsive layouts, and intuitive navigation, ensuring an enjoyable and accessible experience across all devices.
- Implemented on-page SEO with structured metadata and semantic HTML to improve local discoverability for Nepali food audiences.

Tech Stack: *HTML, CSS, JavaScript, FreeBuff, Claude AI, Vercel, Responsive Design, SEO*

ParchaHub — Digital Pamphlet Marketplace

- Architected and built a modern full-stack digital advertising marketplace for Nepal using Next.js and Express.js, enabling businesses to post ads, jobs, events, and rentals online as a replacement for traditional paper pamphlets.
- Designed the backend with Drizzle ORM (MySQL), integrated Multer for file uploads, Pino for structured logging, and Zod for schema validation.

Tech Stack: *Next.js, Express.js, Drizzle ORM, MySQL, Tailwind CSS, Context API, Multer, Pino, Zod*

EDUCATION

Bachelor of Computer Applications (BCA) *2023 – Present*

Tribhuvan University (TU), Kathmandu, Nepal

Higher Secondary Education (Computer Science) *2018 – 2020*

Kantipur College, Biratnagar, Nepal

CERTIFICATIONS

Claude Code In Action *2026*

Anthropic

Completed certification mastering AI assistant development with Claude. Gained hands-on experience in context control, code generation, automation, and advanced integrations including Hooks, MCP servers, GitHub workflows, and the Claude Code SDK.
