PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of production experience delivering high-performance e-commerce platforms for Swedish retail brands. Architected and shipped full project lifecycles independently from component system design through production deployment using React.js, Next.js, and TypeScript. Reduced page rendering times by ~40% via SSR optimization, orchestrated multi-gateway payment integrations (Stripe, Adyen, Klarna, Svea), and drove revenue impact through personalized recommendation engines and precision analytics instrumentation (GTM, GA4, Meta Pixel, TikTok). Skilled at translating business goals into scalable, SEO-optimized, conversion-focused web products.

WORK EXPERIENCE

Frontend Developer | *Hazesoft Pvt. Ltd.* | Kathmandu, Nepal | Nov 2023 – Apr 2026

[Arbetsbyxor.com](#) — Swedish Workwear E-Commerce Platform

- Owned end-to-end frontend architecture of a production Swedish e-commerce store, independently managing component systems, release cycles, and direct stakeholder communication.
- Engineered a flexible CMS builder component that empowered non-technical teams to update storefront layouts autonomously, eliminating recurring engineering bottlenecks.
- Cut page rendering time by ~40% by implementing Server-Side Rendering (SSR) with Next.js, measurably improving Time to First Byte (TTFB) and Core Web Vitals scores.
- Integrated the Svea payment gateway into the checkout flow, delivering a localized, conversion-optimized payment experience tailored for Swedish customers.
- Deployed Recombee recommendation engine via direct API integration, powering personalized product discovery across the full customer journey and driving cross-sell revenue.
- Built a scalable reusable UI component library that reduced redundant code and accelerated feature delivery velocity across the platform.

[ReuseIT.se](#) — Swedish Refurbished Tech E-Commerce Platform

- Designed a comprehensive GTM data layer strategy, enabling accurate marketing attribution and behavioral event tracking across the entire purchase funnel.
- Configured a multi-platform analytics stack (GA4, Meta Pixel, TikTok Analytics, Mailchimp), improving campaign targeting precision and marketing ROI visibility.
- Implemented Redis caching, reducing server load and improving page load performance across high-traffic product listing pages.
- Delivered server-generated XML sitemaps, expanding SEO crawl efficiency and search engine indexing coverage for the full product catalog.
- Collaborated with backend engineers to align server-side data pipelines with frontend tracking specifications, increasing data accuracy for growth and marketing teams.

[Zonefloorball.com](#) — International Floorball Equipment E-Commerce

- Integrated Lipscore ratings and reviews via direct API (bypassing widget) to build a fully custom PDP review experience, increasing buyer trust and conversion rates.
- Implemented Recombee-powered recommendation flows across PDPs, search results, and cart including purchase-history cross-sell logic directly boosting average order value.
- Managed Google Shopping and Google Merchant Center integrations, improving product discoverability and supporting performance marketing campaigns.
- Enforced HTTP-only cookie-based authentication, hardening the application against XSS-based session hijacking.
- Implemented canonical tags and hreflang alternate links, preventing duplicate-content penalties and ensuring correct language/region targeting across multiple international market locales.

Stack: Next.js, React.js, TypeScript, Node.js, Express.js, MySQL, Styled Components, Recombee, Lipscore, Redis, GTM, GA4, Meta Pixel, TikTok Analytics, Svea Payments, Redux, React Query, Formik, Yup, Zod, Jest

Frontend Developer | *Nebulaleap Technology* | Kathmandu, Nepal | May 2024 – Dec 2024

Beemalaya.com — Insurance Comparison Platform

- Developed and maintained frontend features for Nepal's insurance comparison platform, enabling users to find and compare the best insurance policies across multiple providers.
- Built responsive, cross-device UI components using React.js ensuring seamless user experience across desktop and mobile viewports.
- Collaborated with backend teams to integrate RESTful APIs for real-time insurance data rendering and policy comparison flows.
- Optimized page performance and applied SEO best practices to improve organic discoverability of the platform.

Aakhyaan.org — Online Tuition & Learning Platform

- Built frontend interfaces for an online tuition platform serving Grades 1–12 across Science and Management streams, supporting live class delivery for subjects including Maths, Science, Social, and Nepali.
- Implemented responsive layouts and interactive UI components to create an engaging learning experience for students across devices.
- Integrated course listing, scheduling, and enrollment flows with backend APIs to support smooth student onboarding and class management.
- Applied Next.js SSR and SEO optimizations to improve search engine visibility and organic reach for the education platform.

Stack: React.js, Next.js, TypeScript, Tailwind CSS, REST APIs, SEO Optimization

Trainee Frontend Developer | *Hazesoft Pvt. Ltd.* | Kathmandu, Nepal | May 2023 – Oct 2023

Sail Racing — Swedish Premium Sailing & Outdoor Apparel Brand

- Shipped coupon and discount-code functionality into the cart and checkout flow, directly enabling promotional campaign execution for a premium Scandinavian brand.
- Gained hands-on experience in a production-grade Next.js + Styled Components codebase, applying industry best practices for code quality and Git-based version control via GitLab.

Stack: Next.js, React.js, TypeScript, Styled Components, GitLab

Frontend Developer Intern | *Hazesoft Pvt. Ltd.* | Kathmandu, Nepal | Feb 2023 – Apr 2023

- Developed responsive, cross-device UI layouts in HTML, CSS, and JavaScript under senior developer mentorship.
- Contributed to internal React and Next.js projects while adopting Git-based version control and industry-standard code review workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling: Tailwind CSS, Styled Components, CSS Modules, Sass/SCSS

State & Data: Zustand, Redux, React Query, TanStack Table, Context API, Formik, React Hook Form, Yup, Zod

Backend & APIs: Node.js, Express.js, REST APIs, SSR, Redis, MySQL, Drizzle ORM

Payments: Stripe, Adyen, Klarna, Svea Payments

Analytics & MarTech: Google Tag Manager, Google Analytics 4, Meta Pixel, TikTok Analytics, Mailchimp

E-Commerce: Recombee (Recommendation Engine), Lipscore, Google Shopping, Google Merchant Center

Performance & SEO: Server-Side Rendering, Core Web Vitals, XML Sitemaps, Image Optimization, Lazy Loading

Testing & Tooling: Jest, Git, GitLab, VS Code, Postman, Chrome DevTools, Figma, ClickUp

AI-Augmented Dev: Claude, Claude Code, ChatGPT, Gemini, Codex, NotebookLM, Replit, Manus

PERSONAL PROJECTS

ParchaHub — Digital Pamphlet Marketplace

- Architected and built a full-stack digital advertising marketplace (Next.js + Express.js) enabling Nepali businesses to post ads, jobs, events, and rentals — replacing traditional paper pamphlets with a modern online platform.
- Designed the backend with Drizzle ORM (MySQL) and integrated Multer for file uploads, Pino for structured logging, and Zod for schema validation.

Stack: Next.js, Express.js, Drizzle ORM, MySQL, Tailwind CSS, Context API, Zod

Mundum Trail — Cultural Trekking & Tourism Platform

- Independently designed and deployed a cinematic tourism web platform promoting Nepal's Mundum Trail, applying SEO best practices (structured meta tags, keyword optimization) to increase organic discoverability for adventure tourism audiences.
- Built a local products section creating a direct digital commerce channel for artisan vendors along the trail.

Brothers Garage & Bhaiko Swad — Client Websites

- Owned full project lifecycles for two client engagements: an automotive business profile and a restaurant platform from requirements gathering through production deployment on Vercel, delivering responsive, SEO-optimized digital presences.

EDUCATION

Bachelor of Computer Applications (BCA) 2023 – Present

Tribhuvan University (TU), Kathmandu, Nepal

Higher Secondary Education — Computer Science 2018 – 2020

Kantipur College, Biratnagar, Nepal

CERTIFICATIONS

Claude Code In Action — Anthropic 2026

Completed certification covering AI assistant development with Claude, including context control, code generation, automation, Hooks, MCP servers, GitHub workflows, and the Claude Code SDK.
